Professional Summary

Skilled Software Developer specializing in frontend development with a strong focus on SharePoint Framework (SPFx), React, and enterprise UI solutions. Over 4 years of experience modernizing legacy systems, enhancing usability, and integrating enterprise applications. Known for delivering high-performance, accessible interfaces and mentoring junior developers. Strong backend support using .NET Core and REST APIs, combined with process automation via Power Automate.

Skills

- Languages: JavaScript, HTML5, CSS3
- Frontend: React, SPFx
- Backend: Node.js, Express.js, ASP.NET, C#
- Databases: MongoDB, SQL Server
- DevOps/Cloud: IIS Web Server, Azure pipelines
- Tools & Practices: Agile, Power Automate, Power BI

Professional Experience

Accenture   Coimbatore, IN

Software Developer   Mar 2024 - present
- Developing **React components** using **SharePoint Framework (SPFx)** for enterprise-level solutions.
- Implemented **multipart file upload** functionality in SPFx to support large file handling efficiently.
- Migrating and modernizing legacy components from older SPFx versions to the latest version, ensuring compatibility and performance improvements.
- Mentoring junior developers by providing **technical guidance**, support, and structured onboarding processes to accelerate team productivity.
- Developed API's using **.NET core** for supporting Internal projects
- Implemented **Power Automate** flows from scratch to eas the process of Admin people to reduce Manual work.

Cognizant   Coimbatore, IN

Software Engineer   July 2021 - Mar 2024
- Hands-on experience in developing and enhancing web applications using **ReactJS** and **.NET** technologies.
- Built a dynamic application from scratch using **ReactJS** that integrated multiple standalone applications into a single, unified interface.
- Proficient in both **class components** and **functional components** with **React Hooks**, utilizing **state**, **props**, and **Bootstrap** for responsive and reusable UI design.
- Enhanced and refactored business logic to support updated models and calculations within existing **.NET applications**.

- Designed and developed complex **Stored Procedures** using **SQL Server** to support backend processes and business logic.
- Strong experience in **issue analysis**, **bug fixing**, **business validation**, **system testing**, **migration**, and ongoing **enhancement** of existing systems.
- Actively involved in **Agile ceremonies** such as daily stand-ups, backlog refinement, sprint planning, sprint reviews, and retrospectives.
- Created comprehensive **implementation plans**, **deployment strategies**, and **rollback procedures** to ensure successful production releases.
- Managed the deployment process by publishing builds and deploying code to servers, followed by post-deployment validation.
- Maintained clear, up-to-date **documentation** covering technical details and general business procedures to support knowledge sharing and onboarding.
- Monitored for **security risks** and potential **threats**, and implemented preventative and responsive measures in accordance with company policy.

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
